SKILL - 6 Spring MVC Web Request Handling Demo

Student ID: 2400031041

Name:S.Gowtham

Skill Experiment Number: 06

Section Number:75

Code:

Skill6Appliacation.java

```
package com.example.librarydemo;

import org.springframework.boot.SpringApplication;
import org.springframework.boot.autoconfigure.SpringBootApplication;

@SpringBootApplication
public class Skill6Application {

	public static void main(String[] args) {
		SpringApplication.run(Skill6Application.class, args);
	}

}
```

LibraryController.java

```
package com.example.librarydemo.controller;

import org.springframework.web.bind.annotation.*;
import java.util.*;
```

2400031041

```java
import com.example.librarydemo.model.Book;

@RestController
public class LibraryController {

  List<Book> bookList = new ArrayList<>();

  // 1. Welcome message
  @GetMapping("/welcome")
  public String welcome() {
    return "Welcome to Online Library System!";
  }

  // 2. Total books count
  @GetMapping("/count")
  public int count() {
    return 100;
  }

  // 3. Sample book price
  @GetMapping("/price")
  public double price() {
    return 499.99;
  }
```

240031041

```
// 4. List of book titles
@GetMapping("/books")
public List<String> books() {
   return Arrays.asList("Java Programming", "Spring Boot Guide", "Data Structures");
}

// 5. Book details using path variable
@GetMapping("/books/{id}")
public String getBook(@PathVariable int id) {
   return "Details of Book with ID: " + id;
}

// 6. Search book using request parameter
@GetMapping("/search")
public String search(@RequestParam String title) {
   return "Searching for book titled: " + title;
}

// 7. Author name using path variable
@GetMapping("/author/{name}")
public String author(@PathVariable String name) {
   return "Books written by author: " + name;
}

// 8. Add book using POST
@PostMapping("/addbook")
```

240031041

```
    public String addBook(@RequestBody Book book) {
        bookList.add(book);
        return "Book added successfully!";
    }

    // 9. View all books
    @GetMapping("/viewbooks")
    public List<Book> viewBooks() {
        return bookList;
    }
}
```

Book.java

```
package com.example.librarydemo.model;

public class Book {

    private int id;
    private String title;
    private String author;
    private double price;

    public Book() {}

    public Book(int id, String title, String author, double price) {
        this.id = id;
        this.title = title;
```

240031041

```
    this.author = author;
    this.price = price;
}

public int getId() {
    return id;
}

public void setId(int id) {
    this.id = id;
}

public String getTitle() {
    return title;
}

public void setTitle(String title) {
    this.title = title;
}

public String getAuthor() {
    return author;
}

public void setAuthor(String author) {
    this.author = author;
```

2400031041

```
    }

    public double getPrice() {
        return price;
    }

    public void setPrice(double price) {
        this.price = price;
    }
}
```
